

KENETT FERNANDEZ

Las Pinas, Metro Manila | 0956-551-8063 | KenettMF15@gmail.com | linkedin.com/in/kenettfernandez

Motivated Computer Science student with hands-on experience in Linux environments, virtual machine lab setup, and basic network security practices. Experienced in performing network reconnaissance using tools such as Nmap and developing software projects using Python and web technologies. Interested in cybersecurity, malware analysis, and system security, with a strong foundation in problem-solving and technical troubleshooting.

WORK EXPERIENCE

Oen Delivery

Jun 2020 – Dec 2023

Social Media Manager

Philippines

- Managed riders' profiles and coordinated bookings to ensure smooth delivery operations.
- Created, scheduled, and monitored social media content to boost brand visibility and engagement.
- Responded to customer inquiries and feedback across platforms, ensuring positive brand interactions.
- Tracked analytics to optimize social media strategies and campaigns.

LEADERSHIP & AFFILIATIONS

NU APC Gaming Genesis

Aug 2023 – Feb 2025

Creative Director

Philippines

- Led the creative direction for NU APC Gaming Genesis events, ensuring cohesive branding and visual identity.
- Designed promotional materials, event banners, and social media graphics to boost event visibility and engagement.
- Collaborated with the marketing and events team to develop engaging multimedia content.
- Oversaw the creatives team, delegating tasks and ensuring high-quality output within deadlines.

PROJECT EXPERIENCE

Internship Management System | Figma, React, Tailwind CSS

- Designed a student-friendly internship dashboard using React and Tailwind CSS; enhanced overall UI/UX design to improve usability, navigation, and visual appeal.
- Collaborated with team members to integrate front-end components with backend APIs.
- Conducted user feedback sessions to refine features and optimize the user experience.

Home Network Security Assessment | Nmap, Linux, Virtual Machines

- Set up a small virtual lab environment to simulate a local network.
- Used Nmap to perform port scanning and detect active hosts and open services.
- Analyzed scan results to identify unnecessary open ports and improve network security configuration.

IoT Temperature & Humidity Monitoring System | Arduino, MQTT

- Built an IoT system that collects temperature and humidity data using a DHT sensor.
- Transmitted real-time sensor data through MQTT protocol to a broker dashboard.
- Used Arduino UNO R4 WiFi for wireless data communication.

EDUCATION

Asia Pacific College

Humabon, Makati City

Bachelor of Science in Computer Science

Areas of Interest: Software Development, Cybersecurity, Linux, IoT

SKILLS

Languages: Python, C++

Web Development: React, Tailwind CSS, HTML, CSS

Cybersecurity: Nmap, Metasploit, Wireshark, Network Reconnaissance, Port Scanning

Systems & Tools: Linux (Kali, Ubuntu), Windows, VirtualBox, Arduino, MQTT

Design & Other: UI/UX Design, Social Media Management, Content Strategy, Video Editing, Photography
